

Fengxian Offshore Wind Farm is a 414.4MW offshore wind power project. It is planned in East China Sea, Shanghai, China.

There are many factors to consider when choosing a location for a wind turbine or wind farm, such as (but not limited to) the wind resource potential in the area, proximity to existing power lines, and ...

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

The project is part of China's efforts to expand its renewable energy capacity, particularly in offshore wind power. It aligns with national goals to reduce carbon emissions and increase the share of ...

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets.

To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.
